## FOR IMMEDIATE RELEASE

# Innovative Wastewater Treatment Service Expands its Network into Florida and Tennessee

Engineered Spray Solutions (ESS) joins the EnBiorganic Technologies network of licensees to offer cutting-edge wastewater treatment technology options

Las Vegas, NV September 2021- EnBiorganic Technologies, innovator and provider of patented turn-key autonomous systems for the natural, biological treatment of wastewater is pleased to welcome Engineered Spray Solutions LLC of Lakeland, Florida to its licensed network of EBS-Di Installers and service providers.

Providing general contracting services, specializing in spray-applied infrastructure rehabilitation and repair throughout the Southeast for both public and private sector clients, ESS is a recognized leader and solutions provider for businesses and municipalities plagued with failing wastewater, stormwater and chemical containment infrastructure. ESS will be implementing and delivering EnBiorganic's (TAAS) Treatment As A Service solution to wastewater utilities and commercial entities throughout Florida and Tennessee. "Encountering first-hand and taking on tough aging infrastructure integrity and maintenance issues, we are excited to bring a solution like this to our area. The applications for this technology are almost limitless and based on the results we're seeing in other parts of the country, we anticipate this is going to provide a huge benefit to our public utility and private industry customers in the Southeast to resolve some of their biggest challenges," shares Jim Collier, Vice President, Engineered Spray Solutions.

"We are excited to have such a forward-thinking firm like ESS join us in our mission to overcome water treatment challenges, reduce operational costs, and benefit the environment" shares Darrell Liski, CEO of EnBiorganic Technologies. "Together, we will successfully deliver truly sustainable solutions thru Nature's Remedy | Made Ready."
