FOR IMMEDIATE RELEASE

Innovative Wastewater Treatment Service Expands its Network in Western Canada

Vital Utilities joins the EnBiorganic Technologies network of licensees to offer cutting-edge wastewater treatment technology options

Calgary, AB September 2021– EnBiorganic Technologies, innovator and provider of patented turn-key autonomous systems for the natural, biological treatment of wastewater is pleased to welcome Vital Utilities of Lumsden, Saskatchewan, Canada to its licensed network of EBS-Di Installers and service providers.

Vital Utilities is a water/wastewater maintenance and installation service provider serving public, private commercial and industrial customers throughout Saskatchewan. The firm will be implementing and delivering EnBiorganic’s (TAAS) Treatment As A Service solution to wastewater utilities and commercial entities throughout the province. “We’ve been providing electrical and infrastructure repair and maintenance services to wastewater and industrial process water entities for many decades. Becoming part of the EBT network was a natural fit as we are always looking for ways to help clients improve efficiency in their operations, reduce costs, all while being environmentally sensitive and sustainable. We are excited to bring the EBS-Di solution to our region and replicating the amazing results achieved thus far in other parts of North America,” shares Brian Deck, Co-Owner and Operator of Vital Utilities and Lumsden Area Electrical Services.

“We are excited to welcome Vital Utilities to our network as we work together to overcome wastewater treatment challenges, rising operational costs, and benefit the environment” shares Darrell Liski, CEO of EnBiorganic Technologies. “Together, we will successfully deliver truly sustainable solutions thru Nature’s Remedy | Made Ready.”
